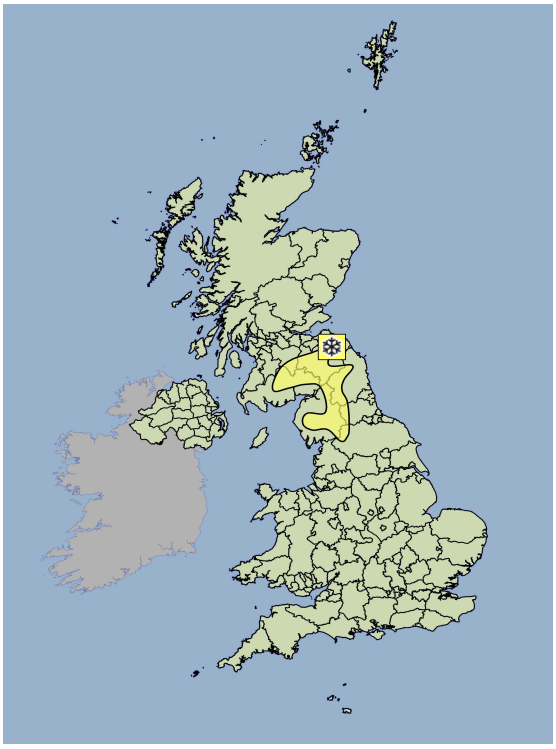
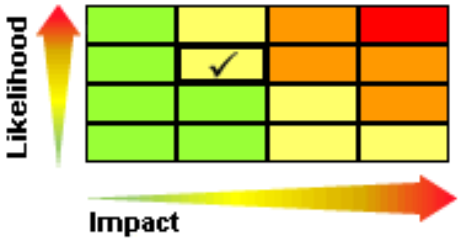
National Severe Weather Warning Service





Chief Forecasters Assessment
An active trough will bring an area of rain, sleet and hill snow eastwards during the afternoon and evening, with the potential for some accumulations of snow on roads, chiefly above 300 metres, but locally down to 200 metres near the leading edge this afternoon.

The Met Office have issued a **Yellow Warning** of **Snow**

Valid from **14:00 on Thu, 13th Feb 2014** until **23:45 on Thu, 13th Feb 2014**

An area of rain, sleet and hill snow will move east across southern Scotland and northern England during the afternoon, turning more showery before clearing through the evening. Most settling snow is likely above 300 metres, where 2-5 cm is possible in places.

The public should be aware of the risk of disruption to travel on some of the higher level routes, where ice will be additional hazard later in the evening.
